I am a Data Scientist interested in surfacing insights from data. I have experience creating accessible visualizations and predictive models for a wide range of applications. I'm passionate about the scientific method and the use of technology to generate positive impact, improve services, and uncover possible solutions.

## EXPERIENCE

---

### Data Science Fellow, Springboard School of Data

Aug 2020 – Present

- Created predictive model to understand student performance in CA K-12 public schools
- Formulated and tested hypotheses to understand demographic factors in performance
- Found and transformed several files to construct unique datasets
- Used machine learning algorithms in classification and regression models

### Data Science Fellow, DS4A Empowerment Program, Correlation One

Oct 2020 – Feb 2021

*Merit-based fellowship with 5% acceptance rate led by Harvard Prof. Natesh Pillai*

- Co-created capstone project to understand financial impact in CA K-12 public schools
- Ran regression models to determine variables of impact and identify confounding factors
- Performed t-test and chi-square analysis for hypothesis testing
- Conducted exploratory data analysis and created meaningful plots to identify patterns

### Research Data Analyst, SELF-lab, UC Davis

May 2019 – Jul 2020

- Ran descriptives and constructed visualization for research in collaboration with the World Bank
- Organized and cleaned data with over 63,000 data points in R / Excel to prepare data for analysis
- Collaborated with researchers and participated in planning meetings

### Research Assistant, Oakes Lab, Center for Mind and Brain

Aug 2018 – Jul 2019

- Ran eye-tracking software SMI, collected and coded infant behavior data
- Screened participants and followed IRB guidelines for research projects
- Trained new RAs on lab procedures and collaborated with the research team

### Research Assistant, Rivera Lab, Center for Mind and Brain

Aug 2017 – Oct 2018

- Carried out data collection for behavioral studies
- Administered eye-tracking to study subjects
- Collaborated with P.I., PhD students, and fellow researchers

### Vice President of Scholarship, PTK Honor Society International

Jan 2015 – Jan 2016

- Partnered with organizations for collaboration on campus projects
- Led weekly meetings with society members to address action items
- Organized and presented induction ceremony to welcome new inductees

## EDUCATION

---

### Springboard School of Data, Data Science

2020 – 2021

*550+ hours of hands-on coursework, with 1:1 industry expert mentorship*

- completion of 2 in-depth capstone projects
- Developed skills in Python, SQL, data wrangling, data visualization, hypothesis testing, and machine learning

### University of California Davis, BS Cognitive Science, 3.65 GPA

2017 – 2020

*Computer Science and Neuroscience emphasis*

- Relevant coursework: Applied Statistics, Biostatistics, Statistical Analysis in R, Linear Algebra, Research Methods, Data Structures and Algorithms in Python, Object Oriented Programming in Python

## PROJECTS

---

### Passing the Standards Projection

May 2021

*Predictive model to project the percentage of students passing standard tests in CA K-12 public schools. This project was an in-depth investigation of factors possibly affecting school performance.*

- Modeled training data with several regression algorithms: linear regression, logistic regression, decision tree, random forest, lasso, and PCA
- Created unique dataset with test scores, financial investment in education, and several demographics regarding students and their families

## SKILLS

---

- Programming: Python, numpy, pandas, matplotlib, sklearn, statsmodel, seaborn, jupyter notebook
- Descriptive and Inferential Statistics: p-value, test for significance (z-test, t-test, chi-squared, ANOVA)
- Experimental Design: A/B testing, hypothesis testing, confidence level
- Predictive Modeling: linear regression, logistic regression, classification, clustering, decision trees, random forest
- Data Science Methods: mining, wrangling, cleaning, analysis, visualization, storytelling
- Version Control: git, github
- Databases: SQL
